Re: Asbestos Dump Site -- Satellite Site
White Bridge Road -- Major Residence

Dear Mr. Jarvis:

This letter is in response to a telephone conversation which we had last week during which you raised your concern that since neither you or I are attending meetings between your clients, David and Joyce Major, and EPA that you were not aware of discussions and agreements made at those meetings.

I have looked into this issue and have learned that at a meeting held on October 11, 1990 between the Majors and EPA representatives, Dick Salkie, Mike Neill, and Pat Seppi, the Majors indicated that they preferred to deal with EPA directly and not through their attorney. If that is the case, it would be inappropriate for EPA to continue to provide you with information concerning this Site.

Would you please send me a letter confirming whether you do or do not represent Mr. and Mrs. Major and if so, for what purposes. If you are representing them, then I would suggest that you either attend meetings with EPA or that you ask your clients to provide you with copies of their notes concerning agreements made at the meeting.

If you are representing Mr. and Mrs. Major for all purposes in connection with the remediation of their Superfund property then EPA will provide you with copies of reports prepared in the regular course of business for your records. Before I provide you with any additional information, however, I need to hear from you concerning your present status as the Major's attorney.

Sincerely,

Carolyn Fiske
Assistant Regional Counsel
